CEWELD 316LSi Tig

certilas® THE FILLER METAL SPECIALIST

TYPE

Stainless steel Tig welding wire (rod) for GTAW welding CrNiMo 316 steels. (Type 1.4430, 19 12 3 LSi)

APPLICATIONS

The alloy is widely used in the chemical and food-processing industries, as well as in shipbuilding and various types of architectural structure.

PROPERTIES

CEWELD® 316LSi Tig offers good general corrosion resistance, particularly to corrosion in acid and chlorinated environments. The alloy has a low carbon content which makes it particularly recommended when there is a risk of intergranular corrosion. The higher silicon content improves the welding properties such as wetting and results in a bright seam.
