

CEWELD SA P-24

TYPE	Vacume melted, medium alloyed, Creep resistant alloy for sub arc welding.
APPLICATIONS	High temperature and creep resistant boilers, pipe work etc..
PROPERTIES	Remarkable creep resistant micro alloy controlled alloy developped to offer high strenght and creep resistant properties at elevated temperatures. Combined with flux FL 155 excelent slag release will be obtained in single and multirun application, the neutral action of the flux offers reliable chemical annalisys to ensure the best possible creep properties.
CLASSIFICATION	
SUITABLE FOR	Creep resistant steels , 7CrMoVTiB, P24/T24, ASTM A213, pipe steel, P24/T24, ASTM A213
APPROVALS	No Approvals Found
WELDING POSITIONS	  
REDRYING TEMPERATURE	Not required
GAS ACCORDING EN 14175
