

TYPE High-alloyed tubular wire on a C-Ni-B- carbide basis for extreme hard deposits on parts subject to

strong mineral abrasion.

APPLICATIONS Cement industry, pumps, mixer blades, sleeves, mixers, shear blades and parts etc...

PROPERTIES High wear resistance and simmilar structure as by C.-Cr. Carbide deposits. The deposit gives a very

good hardness, all spray metal requires no buffer layer except on materials

considered critical. In this Situation Ceweld SP NiAl is recommended. Suited for wear parts subject

to extreme heavy abrasion. The spray deposit is only machinable by grinding.

CLASSIFICATION

SUITABLE FOR High-alloyed tubular wire for metal spray on a C-Ni-B- carbide basis for extreme hard deposits on

parts subject to strong mineral abrasion. applications: Cement industry, pumps, mixer blades,

sleeves, mixers, shear blades and parts etc.
